Megalight Ultra +90

Up to +90% more light on the road ahead
Improve your driving performance

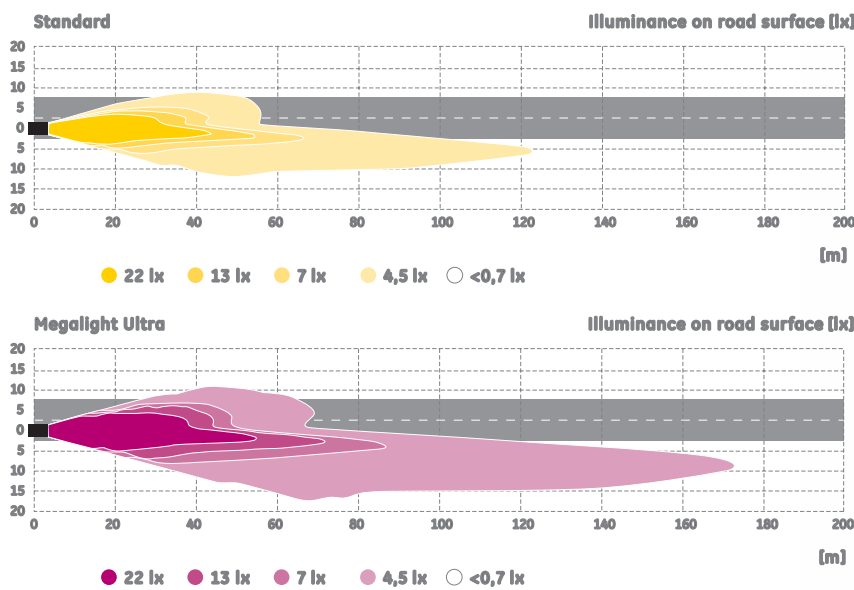

GE imagination at work

Up to 90% more light on the road

High performance lamps for visibility, convenience and style

- GE Megalight Ultra lamps - thanks to their special filament design and coating system, provide up to +90% more light on the road thus improving illumination performance of your headlamps compared to standard halogen 12V lamps available on the market.
- Helps in improved driving performance at night. Major international studies prove, that improved headlamp illumination level helps in reduction of accidents at night time/in poor visibility conditions.
- The greater illumination combined with whiter light resulting from the blue partial coating, add safety to your driving - especially advantageous for elderly and fatigued drivers.
- Silver top gives an attractive appearance, especially in clear lens reflector headlamps.
